STEEL HEAD SHIELDS WORN BY FRENCH

Paris, Aug. 12 .- Pending the manufacture of the new steel helmets for the French army, 700,000 steel head shields have been sent to the front. This is the only species of armor that the soldiers have been permitted to use, as most of the cuirasses, chest protectors, head protectors, coats-of-mail and bucklers offered proved to be almost as dangerous as the enemy's bullets. The head shield, however, as it is used, was recently proved by sta-

there has been no change of importance. On the front between the Vierz and the Bug Wednesday the enemy delivered a series of desperate attacks in the direction of Parczew and on both roads between Cholm and Vladova. All were repulsed with heavy losses to the enemy. These were especially severe east of Ostrow, where the German dead lay in cnormous heaps in front of our positions. On the Bug, the Vistula and the Zlota Lipa there has been no essential change.

In the Dinester district, around the mouth of the Stripa, we stopped an eremy attempt to take the offensive. The enemy, in great force, approached simultaneously the entrance of the Gulf of Riga and the Aland Skerries Tuesday and bombarded the lighthouses. Coming under fire of our warships and shore betteries, the enemy ships rapidly put to the processing the report they were unsuccessful.

The cast of the rond from Vienne-le-Chateau to Binarville is announced in an official statement issued by the French War Office to-night.

The Germans also delivered two assults in the neighborhood of Marie in the Dardanelles, according to a statement given out by the Official Press Bureau to-night.
